SOLUTIONS FOR EVERY APPLICATION

HIGHWAYS

Highways, Interstate work, Median seeding, are easily handled with one of our Gooseneck 1100's or any of our truck mount models.

EROSION CONTROL

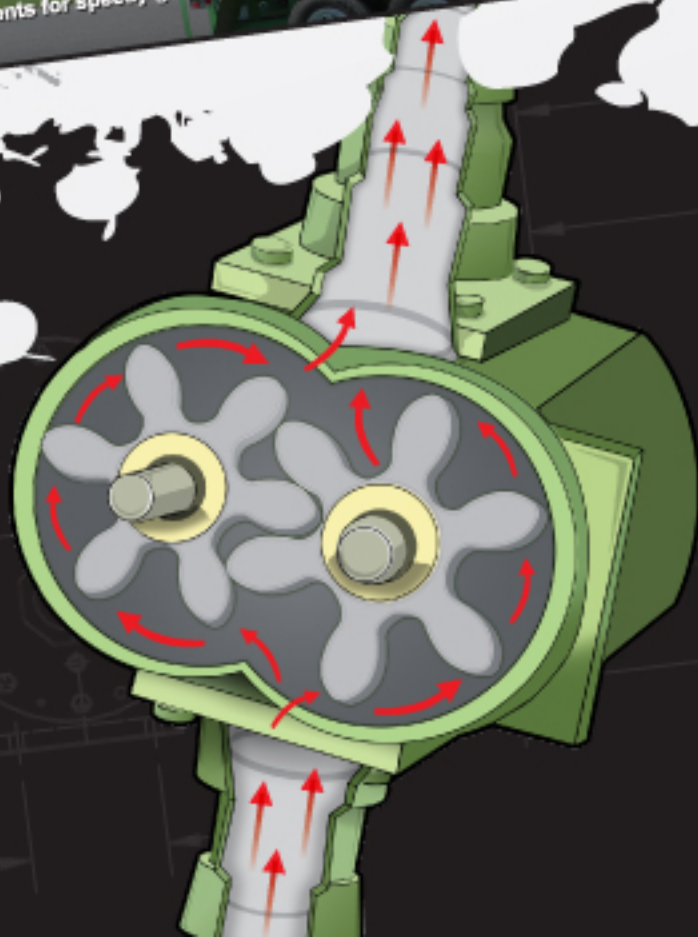

Erosion Control, and Reclamation work are where Bowie has set the standard for over 50 years, handling rugged environments with the necessary horsepower to get the job done right, "the first time."

BEAUTIFICATION

With one of our Victor or Lancer Series models, residential, commercial, and park project assignments are done in a snap providing all the implements for speedy germination.

HYDROSPRIGGING

Done in locations where turf establishment is especially difficult, the Bowie Pump is perfect for distributing sprigs and when doing longer hose runs with high performance BFM's and FGM's.

BOWIE GEAR PUMP TECHNOLOGY

- Positive Displacement Pump
- Easy Maintenance in the Field
- Excellent Results With High Performance BFM's, FGM's
- Preferred When Doing Hose Work and Long Hose Runs
- Originally Designed For Heavy Use in Oil/Petroleum Industry

MODELS FOR ALL SIZE LANDSCAPES[®]

SMALL HYDRO-MULCHERS

Bowie 300

The newest addition to our hydromulcher line. It has all the basic features of the larger units. It is ideal for small jobs and touch-up projects.

Lancer 500

Available in either a skid mount or the popular trailer model. Other available options for this model are a flush system and a manual hose reel.

Lancer 600

An enlarged version of the Lancer 500, incorporating a working platform with a pressure-balanced discharge gun.

INTERMEDIATE HYDRO-MULCHERS

Victor 800

One of the most versatile units due to its size and features. It is available in both trailer and skid mounted models.

Victor 1100

Gives you the same features and performance as the Victor 800, but with additional capacity.

The Victor 1100 is also available in a gooseneck trailer mount providing more storage and easier towing.

LARGE HYDRO-MULCHERS

Imperial 1500

One of the best values of any hydro-mulcher on the market today. Check out the actual working capacity of this machine. The machine, as the entire rest of the Bowie Landscape Equipment Line, is "Built Strong, Built to Last."

Imperial 3000

The largest of the Bowie Hydro-Mulcher line. It can be ordered with options that fit all of your hydro-mulching needs.

LANDSCAPE AND EROSION CONTROL EQUIPMENT

Bowie offers a complete line of seeding and mulching equipment. The Bowie Hydro-Mulcher, Landfill-ADCM, Aero-Mulcher and Crimp-Disc are designed for long lasting economical production. Here are some of the features built into every Bowie Hydro-Mulcher.

We cover the field

Bowie manufactures a complete line of Bowie Hydro-Mulchers designed for landscape and erosion control professionals. Bowie makes equipment that is right for all jobs, from lawn seeding and erosion control to beautification and reclamation projects. We also offer Aero-Mulchers, Crimp-Discs and other equipment built to the highest standards. When it comes to grass and turf establishment, Bowie covers the field.

Visit your Bowie dealer, or give him a call for a demo today. You will find he has years of experience in the seeding and mulching industry. At Bowie, we concentrate on service after the sale. We will teach you everything about your Bowie Hydro-Mulcher, or Aero-Mulcher, and will do everything possible to keep you up and running efficiently for years to come.

For more, go to www.bowieindustries.com to locate the Bowie Dealer in your area.

Testimonials

Cory Streblow
Pacific Rim Hydroseeding

"It's a true commercial grade machine...When you want to get the job done right, you've got to have a Bowie."

Mark Fox
Alliance Landscaping

"We can do anywhere from one load a day to twenty loads a day... When we add a second machine, we can really put a dent in things."

Tim Gregory
Gregory Seeding

"On a scale from 1-10, I'd rate our Bowie Equipment performance, and service - A twelve!"
